Subject
Summary of Site Walk for March 21,2006 Deutsche Bank

History:

This message has been forwarded.

Listed below are the activities that were performed with the EPA in relation to the initial site visit at Deutsche Bank.If you require any additional information concerning the site walk do not hesitate to contact me at the numbers listed below.

1. Kevin Flynn/NJO and James Verbugge/MKE attend an initial project kickoff meeting with the EPA on March 21 2006 starting at 9:00 a.m. Emmet Keveney and Bob Fitzpatrick of the EPA attend and discuss initial project objectives.
2. CH2MHILL and EPA personnel arrive at the Deutsche Bank at 10:30 a.m. to receive initial safety training from Bovis Management representative Jeff Melofchik. TRC representative Arnel Javal also provides input in the safety training in regards to general site rules and procedures.
3. CH2MHILL representatives sign site specific safety acknowledgement provided at the the beginning of training.
4. CH2MHILL representative James Verbugge and EPA representative Bob Fitzpatrick along with a TRC escort dress out to enter into the exclusion zone were initial site preparation activities for abatement at the coin vault are expected to commence within the next two weeks. Kevin Flynn and Emmet Keveney conduct exterior site walk with the specific focus of locating and identifying the perimeter air monitoring locations around the site and the importance of noting any construction related activities that are being performed by others outside the Deutsche Bank site during subsequent site inspections.
5. Kevin Flynn and Emmet Keveney receive photo i.d. badges from the Security Director of Bovis Management that will serve as the means of entry into the site for subsequent site visits.

6. Emmet Keveny departs site at 12:00 p.m. to go back to the EPA office.
 7. CH2MHILL representative James Verbugge and EPA representative Bob Fitzpatrick along with TRC escort exit exclusion zone and return to the TRC field office at 12:15 PM for discussion of the initial site visit. Initial findings related to TRC and focus on eye protection for the abatement workers and for ladder safety. TRC notes these findings and establishes them as action items.
 8. James Verbugge and Bob Fitzpatrick also receive photo i.d. badges from the Security Director of Bovis Management at 12:20 p.m.
 9. CH2MHILL and EPA personnel depart site at 12:30 PM.
- Next Week: CH2MHILL will perform a site inspection on March 28th with James Verbugge/conducting the inspection.
